

## Title: **'Solving the Graphene Scale-up Problem'**

Summary: With graphene enhanced materials demonstrating significant benefits, the current challenge is to scale up production volumes to meet anticipated demand. In the 2 years Versarien's Nanene production capacity has increased 1000 fold. Predictions for graphene demand for the next decade are in the 1000's of tonnes per annum. This presentation will discuss how Versarien and will meet those demands utilising OQEMA's distribution network.
